

How to Prepare and Train for Emergency Procedures

How will you train for engine and equipment malfunctions so that it becomes an automatic reaction? What would you do if you smelled smoke in the cockpit or had a door suddenly open in flight? This seminar will provide an overview of abnormal and emergency procedures that general aviation pilots encounter and often are not prepared due to a lack of knowledge and proficiency. We will discuss best practices and the use of scenarios.

In preparation for 2020, we will discuss the requirements for ADS-B and the looming deadline.

Directions: From Highway 281, head west on Hatton Road, turn left on Old Jacksboro Hwy, then turn left at the airport entrance toward the FBO. Look for the Cobra Kai Flight Academy hangar.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
