

There is no BS when it comes to your BGS

Your engine just quit. If faced with a forced landing situation, the best airspeed depends on what you're trying to do. Are you looking to cover the greatest distance or the longest time in the air?

Here's what you need to know.

The airworthiness guy will discuss how to prevent that engine failure before it happens with information on Electronic Ignition Systems (EIS)

Directions: Travel I40 East and exit at Airport Blvd in Amarillo, TX. Proceed north past the terminal entrance. Turn left on Fox Street, Turn right on Baker Street.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
