

FAASTeam presents:

CRM For The Single Pilot

There is no one right answer in aeronautical decision-making. Each pilot is expected to analyze each situation in light of experience level, personal minimums, and current physical and mental readiness level, and make his or her own decision.

Single-pilot resource management (SRM) is the art of managing all onboard and outside resources available to a pilot before and during a flight to help ensure a safe and successful outcome. Incorporating SRM into GA pilot training is an important step forward in aviation safety. A structured approach to SRM helps pilots learn to gather information, analyze it, and make sound decisions on the conduct of the flight.

Directions: From Veterans Airpark Lane, Continue to Midland Airpark Airport gate. Park on south side of the hangar.

A message from the National FAASafety Team Manager
