

Angle of Attack Awareness

General Aviation accidents still happen that indicate some pilots do not have a firm grasp of the concept of angle of attack, and how important it is to safe flight. Angle of attack is so important that some aircraft have systems designed to automatically reduce angle of attack if it gets close to critical. What is your system to ensure you are always at the “right” angle of attack?

Directions: From Tradewind Street, turn east toward the main terminal building. Hangar 2 is just south of the main terminal building. Park anywhere in the parking lot.

A message from the National FAASTeam Manager
