

## Its As Easy As A-N-C

The top priority — always — is to aviate. That means fly the airplane by using the flight controls and flight instruments to direct the airplane's attitude, airspeed, and altitude. Rounding out those top priorities are figuring out where you are and where you're going (Navigate), and, as appropriate, talking to ATC or someone outside the airplane (Communicate). However, it doesn't matter if we're navigating and communicating perfectly if we lose control of the aircraft and crash. A-N-C seems simple to follow, but it's easy to forget when you get busy or distracted in the cockpit.

From San Angelo Loop 306 head south on Knickerbocker Road to the airport. Turn left onto Reary Blvd and continue to Hangar Road. Turn right at the Skyline hangar and park in the parking lot. The seminar will be held in the flight school.

### A message from the National FAASTeam Manager
