

## Angle of Attack Awareness

General Aviation accidents still happen that indicate some pilots do not have a firm grasp of the concept of angle of attack, and how important it is to safe flight. Angle of attack is so important that some aircraft have systems designed to automatically reduce angle of attack if it gets close to critical. What is your system to ensure you are always at the “right” angle of attack?

You also get a dose of Owner Maintenance, tips and tricks to keep safe.

Attendees with Class II, Non-SIDA access to Abilene Regional Airport can park on the ramp in front of the hangar. All others can park in the TSTC parking lot next to our hangar, or on the grass behind the hangar, provided it has not rained.
