

Chickasha FAA Safety Meeting

Go or no go? While the age-old question for pilots hasn't changed, the amount of information and resources available to assist in this critical decision certainly has. Watch an interactive discussion surrounding several real-world scenarios. We'll examine human factors, preflight planning as well as dynamic events unfolding en-route from developing weather to system abnormalities - all with the goal of affecting a successful outcome just as you would in the aircraft. Included will be decisions for pilots of all backgrounds and experience levels - from the casual VFR pilot to the most instrument proficient. Webinar originally aired March 3, 2016.

Directions: Chickasha Municipal Airport Terminal Building

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
