

Christiansen Flight School Wings Meeting

Mechanics, like most pilots, are human and prone to mistakes. Every year someone dies or loses their airplane because of incomplete or incorrect maintenance. While it's the mechanics job to perform the maintenance and paperwork, it's your job as a pilot to determine whether the aircraft is in a condition for safe flight and that the aircraft has been approved for return to service.

Directions: Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines. Please expect to wear a mask.

A message from the National FAASafetyTeam Manager

Earn your WINGS to get a chance to win a cash prize. Go to www.mywingsinitiative.org for more info.
