

Topic of the Month December Making the Numbers

Critical Aircraft Performance Parameters - Making the Numbers

- General aviation accidents continue to be associated with inaccurate or unreasonable expectations with regard to aircraft performance.
- Accidents occurring in the takeoff and initial climb phases of flight are likely to be fatal.
- Accurate prediction of aircraft performance is essential to dealing with power loss – particularly when power is lost during the takeoff and climb phases of flight.
- Regular assessments of pilot performance are essential to accurate performance predictions.
