

## Topic of the Month July Tail Wheel Transition Training

### Teaching Points:

- Pilots should train to maintain existing capabilities and to add new capabilities. Tailwheel training can provide new piloting challenges and improve airplane handling in other aircraft types.
- Once in the air, tailwheel aircraft are roughly equivalent to nosewheel aircraft of the same size and weight.
- On the ground, tailwheel aircraft are more demanding than an equivalent aircraft equipped with nose gear.
- Pilots are advised to seek experienced Flight Instructors and well-maintained aircraft for tailwheel flight instruction.
