

San Antonio FAASTeam presents:

IMC Club - A Passenger in Pain

What do you do with a sick passenger on the ground? Are you truly Captain of the airplane or pilot in command from the time you roll until engine shutdown? I think we all know the answer to those questions. Sometimes emergencies don't happen in the air or with the airplane or the weather. What would you do on the ground? Be ready to discuss your options and what you would do at a busy airport with someone sick on the ground.

EAA/IMC Club, through the EAA's global Chapter structure, provides organized "hangar flying" focused on building instrument flying knowledge and skills. The program's network promotes a safety culture through continued education and believes that we develop safety and proficiency through education and real life experience. Monthly meetings offer an opportunity to share in-flight experiences and valuable safety tips. Through the FAA Safety Program, aviation professionals provide informative WINGS presentations. You do not have to be an instrument rated pilot to attend. Membership in the EAA/IMC Club is encouraged but not required to participate in this meeting.
