

## Randolph Air Force Base Civil FLY-IN

Randolph Air Force Base has a rich history and critically important mission in preparing pilots for the defense of our Nation. Many of the training activities share the same airspace that we, General Aviation, utilize all over Central Texas. The 12th Flying Training Wing is hosting this event to build on the positive relationship that exists between the Air Base and the Central Texas Community, and to increase the awareness of the Pilot Community to the Air Force Activities in the area.

While the improved community relations are important, it is the increase in Aviation Safety that is the ultimate goal of this event. As the airspace becomes more crowded and more aircraft are going "GPS-Direct" the potential for encounters with other aircraft increases. Learning how and where the Randolph training aircraft operate can improve your Situational Awareness and make it easier to avoid some of these high-traffic areas.
