

DA: It's Just a Bunch of Hot Air!!!

It's summer in Texas and the one thing most agree on is that it is definitely HOT here. Besides being annoyingly uncomfortable in an un-air conditioned airplane, the heat robs us of precious performance needed to get into the air in the first place. Understanding Density Altitude (DA) is key to operating effectively with reduced aircraft performance.

Directions: The terminal building is 200 feet northeast of the Denton control tower.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

Event Details
