

CO -- It's a Gas!!!

Is carbon monoxide a threat to you when flying? Are you sure? When was the last time you thoroughly (and properly) checked? The combustion engine in the airplane you fly creates colorless and odorless carbon monoxide (CO). This CO can inadvertently enter the cabin area and pose a serious threat while flying. Learn more about this potentially deadly and silent killer and how you can improve your chances of not having carbon monoxide poisoning happen to you.

Directions: FLYING: TCCD aircraft parking ramp is off taxiway A3.

DRIVING: From I-35W (North or South), take the Westport Pkwy exit. Turn West on to Westport Pkwy, then North (Right) on Heritage Pkwy, then West (Left) on Horizon Drive. Go to the end of Horizon Drive. TCC is the building on the right. Park in the lot in front of the building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
