

Things That Go Bump in the Night and ICAO Flight Plans

1. Lockheed Martin, as well as the Navy and Air Force, routinely conduct low altitude, high speed flight tests all around the local area. Learn where and when these flights occur -- and how to become aware of these activities before your next flight inadvertently crosses paths with one or more of these "fast movers".

2. This Fall, the ICAO flight plan will be replacing the FAA flight plan most of us have been using for the past 50 years or so. Learn the essential information and the differences in this new ICAO form.

Directions: The terminal building is 200 feet northeast of the Denton control tower.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
