

Inside/Outside - Pilot Safety and ADS-B

Carson Pierce will investigate the pilot's need in VFR flight to remain situationally aware, and how easy it is to use advanced tools like ADS-B as a crutch, rather than an aide, regarding situational awareness.

Directions: The seminar will be held in the first floor conference room of the James T. Connally Aerospace building at Texas State Technical College-Waco. The Aerospace building is the main terminal building for the TSTC international airport and is located just off of Airline Drive.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
