

Convective Weather for Pilots Part 1

Much of what pilots are taught about convective weather is incomplete, and in some cases incorrect. This course covers convective and severe weather, and material many pilots are not familiar with. This material will give pilots additional insight into the probability and likely severity of weather and how to avoid convective weather surprises. Part 1 covers convective weather factors and what causes it to become severe. Part 2 will cover convective weather products and obtaining better weather briefings. There is a fee for this class, contact Collin College at 972-985-3711 for registration information.

Directions: Collin College is just East of Preston Road between Preston Park and Old Shepherd Pl. Check the monitor in the lobby for room number.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
