

North Texas FAASTeam SW19 presents:

IMC PROFICIENCY and DECISION MAKING-MAKE IT PERSONAL

.Participants will analyze two accident scenarios where pilots made questionable decisions under the stress and confusion that IMC flying can and often does create. What led to the suboptimal decisions? How can we avoid task saturation and insure solid decision making when flying in IMC? What thought processes and actions will mitigate risk, improve competence, and avoid the outcomes presented in the scenarios.

Directions: If flying land at KDTO and park under the control tower. Proceed from ramp directly to the terminal building adjacent to the control tower
