

VNAV and Visual Approaches Helpful or Dangerous

ForeFlight, Garmin, and Avidyne have all introduced great new VNAV & Visual Approach features for IFR pilots. But do you know the best ways and times to use them are the exception, not the rule. Most good pilots and CFIs use them incorrectly and too often, which can increase workload and the chances of failed approaches, an FAA pilot deviation, and mid-air collisions. Come learn from the top expert who has more experience than any other instructor when and how you should best use these features

CFAA(Central Florida Aerospace Academy) is inside SunNFun at Lakeland Airport. The building is located at the corner of Medulla Rd and Peggy Brown Rd. near the main entrance.

The class is free but requires admission to SunNFun. For more information please visit <https://flvsnf.org/>
