

3 IFR Alternates You Need In Every Flight Plan

Good pilots, CFIs, and DPEs know the 1-2-3 rule and when to add an alternate in bad weather... Most good pilots don't know why using this rule can put you in danger! With over 20 years of REAL-WORLD IFR experience, Gary "GPS" (Guy in the Pink Shirt) Reeves will show why every pilot needs 3 IFR Alternates in EVERY FLIGHT PLAN!

2 Special Bonus Topics: ForeFlight Alternate "advisor" cautions and the best way to add alternates to Avidyne and Garmin GPS units. Sign up today to join us live in an interactive group session, or watch the free recording later.
