

## IFR Safety - Mastering GPS Procedures

Confused by all the GPS approach types? You're not alone. In this essential class, you'll finally master the real-world differences between LPV, LNAV, L/VNAV, LP, and +V—and how to fly each one correctly. Learn when and how to use your autopilot for each type, avoid costly mistakes, and file your ICAO flight plans the right way. If you fly IFR with GPS, this is a must-attend session that could save your checkride or your life.

This is a free live class (NOT ONLINE) included with admission to EAA AirVenture. For info on purchasing tickets that support the non-profit EAA, please visit:
