

The Real Cause of Most Pilot Accidents

We've all heard the usual suspects—get-there-itis, CFIT, VFR into IMC—but those are just the final symptoms. The true root cause of most pilot accidents is deeper, more dangerous, and rarely addressed. In this eye-opening session, you'll discover the hidden factor behind countless tragedies—and how a simple shift in mindset and training can prevent them. If you're serious about safety, this is the one class you can't afford to miss.

This is a free live class (NOT ONLINE) included with admission to EAA AirVenture. For info on purchasing tickets that support the non-profit EAA, please visit:
