

## EAA Chapter 323 Monthly VMC Club Meeting

The VMC Club meeting will commence after the monthly Texoma Aero Club (TAC) meeting & pancake breakfast at the North Texas Regional Airport (KGYI).

Go-arounds are one of the most underutilized yet essential safety maneuvers in general aviation. Too often, pilots attempt to salvage unstable or unsafe approaches, leading to runway excursions, hard landings, or loss-of-control accidents.

### Event Details

**Sat, Aug 16, 2025 at 08:30 CDT**

**Texoma Aero Club Hangar**

4700 Airport Drive

Executive Hangar # 154

Denison, TX

This presentation will cover the critical elements of a stabilized approach, provide ten common scenarios where a go-around is the safest decision, and offer practical techniques for executing a smooth, well-managed go-around. Using real-world examples, accident data, and pilot decision-making strategies, we'll highlight how planning for a go-around before every landing can reduce risk and improve overall airmanship. This session will help sharpen your approach and landing skills while reinforcing that a go-around is not a failure—it's a smart, proactive safety choice.

Event will be approximately 2 hours with a 1 hour safety presentation.

If flying in, taxi to the executive hangars adjacent to the Alpha taxiway north of the tower. There is a Texoma Aero Club sign on the hangar. If you are driving in, you can go to the Rise Fixed Base Operations to be let through the gate and proceed to the executive hangars. If you have a gate code, enter on Don Ort Drive, then turn right to access the executive hangars.
