

## EAA Chapter 323 Monthly VMC Club Meeting

Join us for September's FAA Safety Team (FAASTeam) *Topic of the Month* seminar, focusing on one of the most fundamental yet critical aspects of aviation maintenance: safety wire and fastener security. Improper safety wiring and neglected locking devices have contributed to numerous accidents and incidents in general aviation. This presentation takes a practical, engaging look at why "if there's a hole in the bolt, there should be wire in it."

The event will run approximately 2 hours with a 1-hour safety discussion.

If flying in, taxi to the executive hangars adjacent to the Alpha taxiway north of the tower. There is a Texoma Aero Club sign on the hangar. If you are driving in, you can go to the Rise Fixed Base Operations to be let through the gate and proceed to the executive hangars. If you have a gate code, enter on Don Ort Drive, then turn right to access the executive hangars.

### A message from the National FAASTeam Manager
