

IFR Safety / Mastering GPS Procedures

Confused by all the GPS approach types? You're not alone. In this essential class, you'll finally master the real-world differences between LPV, LNAV, L/VNAV, LP, and +V—and how to fly each one correctly. Learn when and how to use your autopilot for each type, avoid costly mistakes, and file your ICAO flight plans the right way. If you fly IFR with GPS, this is a must-attend session that could save your checkride—or your life.

CFAA(Central Florida Aerospace Academy) is inside SunNFun at Lakeland Airport. The building is located at the corner of Medulla Rd and Peggy Brown Rd. near the main entrance. The class is free but requires admission to SunNFun. For more information please visit <https://flysnf.org>
