

EAA Chapter 1246 Monthly IMC Club Meeting

The EAA IMC Club provides a "hangar flying" experience organized around instrument flight, in order to promote safety, education, and proficiency.

Every meeting consists of a scenario presentation and group discussion about unusual or interesting charts, changed rules and procedures, and member experiences. We also have occasional guest speakers.

The scenario(s) we will discuss at this meeting is/are: This month we will utilize an FAA National Safety Team slide show called Angle of Attack Awareness. We will look at how to maintain awareness of this critical concept during IMC conditions. We will review critical aerodynamic concepts, discuss the dangers of uncoordinated flight, look at unusual attitude recovery in IMC and discuss how to mitigate one of the biggest threats to general aviation safety - Loss of Control Inflight.
