

CO - Its a GAS!!!

Is carbon monoxide (CO) a threat to you when flying? Are you sure? When was the last time you thoroughly (and properly) checked? The combustion engine in the airplane you fly creates colorless and odorless carbon monoxide. CO can inadvertently enter the cabin area and pose a serious threat while flying. Learn more about this potentially deadly and silent killer and how you can improve your chances of not having carbon monoxide poisoning happen to you.

From Denton I-35 and US-380, go north on I-35 thru Gainesville to exit 498 / Hwy 82.

Turn left on Hwy 82 for about 3 miles to Weber Drive and turn right.

Turn right on Colorado Drive and left on Airport Drive to Ayers Aviation.

A message from the National FAASTeam Manager
