

Cinch-up Boys We Are Going to Ride this Bronc

Aircraft landings are complex maneuvers that require precision and control. When an aircraft lands too fast it can lead to serious incidents or accidents, affecting not only the aircraft but also passengers, crew, and ground personnel. The presentation will explore potential causes, and the aftermath of landing at excessive speeds.

From Dallas take I-35 North toward Denton, merge onto US 82 E. via exit 498 toward Sherman. Take the exit 624 toward US 377/Whitesboro and go straight ahead to merge onto US82, then turn left on US/377 North and look for Cedar Mills sign for the entrance. Seminars will be held in the lodge starting at 9:00am.

A message from the National FAASTeam Manager
