

Airmen Certification Standards

Years in development, the FAA's new Airmen Certification Standards (ACS) came into effect on June 15th. The FAA's ACS has been developed with a diverse group of aviation authorities and replaces the Practical Test Standards. The new ACS is aimed to improve the training and testing of future pilots. These exciting improvements for airman testing and training might have you asking yourself "am I prepared for the ACS?"

Skyview Aviation has invited Designated Pilot Examiner (DPE) Vince Nastro to help guide us through the New Airmen Certification Standards. Draw on Nastro's wealth of aviation knowledge to gain a clearer understanding of the ACS and how it will affect you.

Directions: Pilots who fly in should park in transient parking in front of Skyview Aviation. Automobile parking is available in front.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
