

# To Stall or Not To Stall? The Choice is Yours!

Video and Discussion about the causes of Stalls and the life saving lessons we need to learn about them. You'll learn about stall dynamics, and how to tell in advance which wing will drop first and why. Plus, revealed will be the rare, but dangerous type of stall that all too often is ignored. It requires a totally counter-intuitive recovery method.

**Directions:** First driveway going south past Airport Avenue (College Dr. - Traffic Light) Southeast corner of KSMO. Located inside the big green four story building on the first floor. Just enter through the front doors, and turn left at the first aisle. Room #123 will be to your right, at the end of the aisle. Plenty of free parking.

## A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
