

Aviation Weather Seminar Part 1

In this 90 minute webinar we begin the process of helping you to become a proficient self-briefer. In session 1, you will learn the basics of pressure, wind and temperature. You'll also learn about stability and sources of moisture and how they contribute to creating the perfect storm. At the end of this session you will be able to read a surface analysis and estimate cloud levels. Additionally we will cover synoptic and mesoscale event across the country and touch on constant pressure charts. Click here to register.

Directions: Online Webinar Only

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
