

AEROMEDICAL Adventure Part 2 A Step Beyond the Familiar

A pilot's quest for fitness is as important as learning to land. We'll address what you can do. The Earth's Atmosphere extends upward to 1000 nautical miles. We'll learn about it's four distinct divisions and how the nature of flight is affected. We'll learn about Boyle's Law, Henry's Law, Dalton's Law, & Graham's Law.

We'll review the various facets of Hypoxia, we'll learn about how we can be affected by trapped gases, and we'll spotlight vision, and what pilot's need to know about what we think we can see clearly.

Directions: Enter the airport area at the Osborne St. main entrance near the intersection of Osborne and San Fernando Road. Plenty of free parking. Drive to far end of lot near Airport Manager's office.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
