

FAASafety Team presents:

INTRO into SKEW T WX Forecasting

A FULL PICTURE, Winds aloft, almost everywhere. Locate the warm air, avoid icing. Skew T Weather Forecasting means you can prepare to know WHY a forecast is Right or maybe Wrong. How Better to Prepare for Safe Flight than to understand the signs that indicate what might lie ahead in your flight. This morning we will BEGIN to uncover understanding the SKEW T Diagram, the graphic that tells the BIG story; the graphic meteorologists use to form their forecasts. Yes, we will make learning some Introductory weather theory interesting!

Directions: Easy access from Woodley, north of Sherman Way. Plenty of free parking at the Fly Away spots marked, "30 minute parking" located in front of the building. Don't enter the indoor parking unless you wish to pay the regular fee. You can use either the outdoor staircase to the conference room, or the elevator located inside the lobby area.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
