

FAASTeam presents:

# ForeFlight 101 (Food and beverages served)

This will be a 2-hour class on the use of ForeFlight.

Learn to set up and use ForeFlight to its full potential to plan your flight and more. We will plan several exemplar flights, including one or two of audience choice.

ForeFlight is a widely and very sought-after application and as such requires proper usage techniques for it to be valuable. It is a feature that is not always understood and if not used properly could cause very serious safety issues affecting the aviator and the National Airspace System (NAS).

Topics will include ForeFlight Settings (including aircraft setup), Preflight Planning (including weather briefing), Route Planning, Airspace, Weight & Balance, Overview of ForeFlight's Popular Features, Postflight Activities (including Track Log and Logbook).

Please bring a fully-charged iPad with ForeFlight installed and Utah charts downloaded.

Supporting documents and PowerPoint slides will be on [www.CaptainSchiff.com](http://www.CaptainSchiff.com)

**Directions:** SkyPark Air Terminal at Skypark (KBTF) Airport  
Event is inside Air Terminal, drive to address or if flying in, park on ramp.
