

FAASTeam presents:

# Weather Risk Assessment-Weather Briefings 3

In this 90 minute webinar (plus Q&A) Delia will demonstrate her method to clarify and add certainty to often conflicting weather information.

- Learn the top tools to identify each of the six hazards
- The tool most pilots rely on—that is actually the LEAST reliable tool (and what to use instead)
- How to identify “invisible” hazards.
- Recognizing LLWS even when it's not forecast.

This is our level 3 class for more experienced pilots, however, it can also benefit low time pilots.
