

FAASTeam presents:

Preflight Weather Self-Brief - Basic

Weather is the most lethal of all major causes of aviation accidents.

In this 60 minute webinar, learn the practical lessons you can apply to increase the speed and accuracy of your preflight weather briefings. Learn the 6 elements you MUST CHECK in any brief. How to significantly reduce the mountain of needless data. How to use (and the value of) the new graphical forecast for aviation. Where to identify each of the six aviation weather hazards.

This is for anyone who is looking for a simpler, faster way to accurately perform a preflight brief and identify the potential hazards without complexity.

Directions: Register here for this webinar:

Note: When you register you will receive emails from Easy Webinar or Fly-Rite. You can easily opt out anytime. Look for the "unsubscribe" link at the bottom of each email.
