FAASTeam presents:

Tools and Techniques for Checklist Flows and Flight Configurations

Using checklists is an integral part of being a pilot. However, the topic of how to use checklists brings up a number of questions and frequent disagreement among pilots, such as:

- Do I read the checklist and do it as I go?Or should I use flows and then check?
- What should I memorize?
- Should I make my own checklist or use POH?
- What if I fly different aircraft?

For this meeting, we are going to walk through the phases of flight and discuss different techniques and collective best practices to incorporate Checklists, Flows, and Flight Configuration templates:

- Pre-Flight
- Normal Operations
- **Emergency Procedures** Post-Flight
