

May the Aerodynamic Forces be with You

"Upping the ante" big time regarding the forces of flight and maybe how we were trained to understand them. This seminar is for the serious pilot, but everyone will enjoy it! The second half of this seminar will focus upon the left turning forces that we as pilots face every day, AND a live hands on demo that everyone can participate in, so that turning force can be experienced in person by all.

You most likely will leave the seminar with a totally different view about that which enables flight than previously held. Seminar length 2 hours

Enter the airport area from Osborne St. east of the main entrance near the intersection of Osborne and San Fernando Road. Plenty of free parking. Drive to Vista Aviation. Plenty of free parking.

A message from the National FAASTeam Manager
