

Hangar Talk Saturdays (KVNY) Security in General Aviation

Could a security threat develop around your aircraft without you recognizing the warning signs? Security in aviation goes far beyond locked doors and airport gates. This seminar explores practical security considerations for pilots and aviation professionals, including threat awareness, suspicious activity recognition, access control, and emergency response planning.

Attendees will gain real-world strategies to improve security awareness both on the ground and in the air while learning how to better protect passengers, crew, aircraft, and airport environments. Discussion will include practical examples of security concerns affecting general and corporate aviation and how pilots can develop a stronger safety and security mindset.

Easy access from Balboa Blvd. Plenty of free parking. Seminar length approximately 2 hours.

A message from the National FAASTeam Manager
