

You Do Not Know What You Do Not Know - Let Us Fix That

What don't you know that could someday affect the safety of your flight? Every pilot has knowledge gaps—but the safest pilots are the ones who recognize them and continually seek to improve. This seminar explores commonly overlooked aviation topics, misconceptions, and practical lessons that can strengthen your knowledge and decision making before they become critical in the cockpit.

Through real-world examples, interactive discussion, and practical scenarios, attendees will examine situations that often surprise even experienced pilots. Topics may include regulations, aircraft systems, weather, communications, aeronautical decision making, and operational best practices designed to improve proficiency and reduce risk.

Enter off of Osborne Street near San Fernando Road. Seminar length is 2 hours.
