

KWJF Saturday Morning FLY SAFE Meeting

Join us for an in-depth look at serious mountain flying and back country airstrip operations from an experienced pilot who has been there! John Litton has 40+ years of experience operating at high altitude, mountainous, back country airstrips in California, Idaho, and throughout the West. He will talk about what you need to safely fly in this environment, including **Aircraft Requirements** (type, power, modifications), **Pilot Requirements** (what training you need, where to get it), **Proficiency, Preflight and Planning Resources**, **High DA and Unprepared Runway Performance** (real-world vs ideal charts, leaning procedures, loading), and **Real-Time Decision-Making** (should I attempt a landing or takeoff? Go-around options?) John has some **great videos** of high-country landing strips (beautiful and will convince you that you need specialized training), and will include several **accident reviews**.

From Hwy 14 in Lancaster, turn West on Ave G. Turn right at the Fox airport sign. Turn left onto one-way circular road in front of terminal building.

Seminar Length is 1.5 hours.

A message from the National FAASTeam Manager
