

## Non-tower operations procedures review at Fullerton airport.

With the announced closure of several ATC facilities in the LA Area, it's a good time to take a review of the standard rules and procedures for use at Non-tower airports, as well as the specific methods for arriving and departing at Fullerton Airport. We will review proper methods for VFR and IFR flights, communications, flight paths and more. This event has been scheduled to coincide with the announced scheduled closure of the Fullerton Air Traffic Control Tower. Please join us to become familiar with procedures and techniques in use by the various operators at the airport.

**Directions:** AFI Main Hangar, next to self-serve fuel island west of the terminal building.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
