N/A presents:

Anatomy of an Accident Investigation

What exactly happens between the time an aircraft accident happens and the final accident report is published? NTSB Accident Investigator Patrick Jones will take us behind the scenes and discuss what happens from the initial call, to the on-scene investigation, and all the rest of the process in determining the probable and contributing causes, to publishing the final report. The NTSB spends a tremendous effort to determine exactly what happens, and what makes each aircraft accident unique, even though many accidents share common characteristics. There is a modest fee for this event.

**Directions:** AFI Main Hangar, next to self-serve fuel island west of the terminal building.
