

LANDING PRACTICE - - For When The Engine Goes Silent

For our Tuesday, July 3 EAA Chapter 92 meeting, join us for a potentially life and limb saving session on an excellent way to prepare, in a very realistic way, for a possible emergency landing in inhospitable terrain.

Lil' John and Big John, two avid backcountry pilots, set up their own advanced back country practice school on various dry lakes in Southern California. They make an effort to practice at least once a month, because with a lag between sessions, the skills begin to diminish. This practice has already saved one of their group who experienced an engine out on take-off.

Directions: On Sand Canyon Avenue between the 5 and 405. Corner of Sand Canyon and Waterworks Way. Turn LEFT after entering parking lot from Sand Canyon. If entering from Waterworks Way, continue through parking lot to SECOND building. Follow signs to Community Conference Room in 15500 Sand Canyon building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
Sign up for the FAA's safety services at www.FAASafety.gov!
