

Laugh and Learn with Rod Machado

Rod Machado will discuss the issues associated with aging and flying. This is a topic for anyone interested in learning about how age affects our ability to fly an airplane safely, as well as learning how to fly an airplane. Rod will cover techniques on how to compensate for the normal (and expected) change in our physical, perceptual and cognitive skills as we age. This program is also highly relevant for all flight instructors who teach middle-aged students. Come prepared to laugh and learn with Rod Machado.

Directions: Exit the 5 or 91 Freeway at Magnolia Ave northbound. Turn left on Commonwealth Ave. In about 1/4 mile, you'll pass the airport terminal and ATC tower building; AFI is the next building to the west. AFI Main Hangar, next to self-serve fuel island west of the terminal building.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
