

**FAAS**Team presents:

# **IFR Refresher**

This is a full IFR ground school refresher that is primarily for instrument rated airplane pilots, whether current or not. It is also appropriate for those currently studying for their initial instrument rating. We'll review everything from pilot qualifications and logging, through equipment requirements, flight planning, weather, charts, regulations and documents, to in-flight techniques to hone your single pilot IFR flying skills, and much, much more.

Bring your fully-charged iPad or other tablet device loaded with your favorite EFB and flight data and documents appropriate to California. Or, bring your paper charts and books if you prefer. Mike Jesch has been a single- and multi-engine instrument ground and flight instructor since 1985 and has flown many thousands of hours "In the System." He puts that wealth of knowledge and experience together with an open and approachable style, to help refresh your knowledge, confidence, and readiness to be a Real IFR Pilot.

Class will start at 8AM and run until 3:30PM. Breakfast pastries, lunch, water and coffee will be provided.

Ground school logbook endorsements for instruction received will be available.
