

FAASTeam presents:

Long Nights Journey Into Day

For our March EAA Chapter 92 meeting, join us for a refresher on something that many of us don't do that often - fly at night.

Flying is different at night. From planning, through preparation, physiology, procedures, risk identification and mitigation, to completing your logbook afterward, things are very different when the sun goes down. Yet, many of the same issues in play also have a role in daytime flying, and exploring them a bit can help make your flying safer and less stressful, even in the bright light of day.

Join Jay Mason, ATP and CFI, as he sheds some daylight on night flying techniques, and how they can illuminate your pilot skill set.

Directions: On Sand Canyon Avenue between the 5 and 405. Corner of Sand Canyon and Waterworks Way. Turn LEFT after entering parking lot from Sand Canyon. If entering from Waterworks Way, continue through parking lot to SECOND building. Follow signs to Community Conference Room in 15500 Sand Canyon building.

Event Details

Tue, Mar 3, 2020 - 19:00 PST
Irvine Ranch Water District HQ
15500 Sand Canyon Ave
Community Conference Room
Irvine, CA 92618
