

N/A presents:

Hiding In Plane Sight

It's no secret that Southern California is home to some of the busiest, most complex airspace in the world. Pat Carey and Ron Berinstein will discuss how this came to pass, where the biggest trouble spots are, and what you can do to keep yourself safe, when operating in this area.

Learn where the LA hot spots are; accidents happen there! Learn where NOT to fly! Enjoy and learn from a discussion focusing on reviewing airspace requirements, and those procedures you need to know for flying safely around the basin. We will expose certain popular, but potentially dangerous flight routes.

Focus will be on the area surrounding LAX and the central LA Basin. We will expose hidden dangers that exist daily, but are sort of invisible. We will offer a free to use flight application that can be downloaded for use with ForeFlight or Garmin Pilot, that will help pilots to safely navigate the area.

Prior to attending a safety seminar please review and abide by current CDC, State, and Local health guidelines.

Directions: Meeting room is the main maintenance hangar at Aviation Facilities, Inc (AFI), which is the building west of the main terminal building at the airport.
