

N/A presents:

In Flight Weather Resources - and Volunteer Flying Opportunities

Two feature presentations will be put on tonight, starting with the FAA's Topic Of The Month on the subject of In Flight Weather Resources. The 21st Century has brought an unprecedented wealth of information to general aviation cockpits. Near real time graphical and textual weather products contribute greatly to pilot situational awareness and decision making. But pilots must understand the capabilities and limitations of the equipment and the information it provides.

Next, FAPA member Ray Stratton will discuss how flying as a volunteer pilot can make you a better and safer pilot. Take your flight planning process to the next level when you have to take in new considerations, go new places, and meet a schedule.

Directions: Meeting room is the main maintenance hangar at Aviation Facilities, Inc (AFI), which is the building west of the main terminal building at the airport.
