

FAASTeam presents:

Flying Safely to Baja California With the Flying Samaritans

This presentation offers pilots information about how to safely get involved with an experienced organization that provides healthcare and international flying opportunities to Baja California. Each month a group of volunteer pilots is coached in safely navigating the challenges of cross country flying south of our US ADIZ Border. Pilot, Plane, Plan, Programming and Passenger preparation will be addressed by the president of the Flying Samaritan organization, John Greek. Learning how this organization prepares for flights will help all pilots expand their understanding of preparation required for cross country flying and perhaps motivate those interested to use their piloting skills to contribute to a worthy cause.

Directions: Meeting room is the main maintenance hangar at the old Aviation Facilities, Inc (AFI), which is the building west of the main terminal building at the airport off Commonwealth Ave.
